## **DETAILED ACTION**

### ***Claim Objections***

Claims 10, 13-17 are objected to because of the following informalities: the Applicant refers to AlGaIP in the specification and claims; however the claimed material should be AlGaInP. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 10, and 12-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding Claim 18, it is unclear what the structural relationships are between the first and second semiconductor regions. Examiner suggests adding the limitations of original Claim 11 to independent Claim 18.

Regarding Claims 10 and 12-14, it is unclear what an "etching control layer" comprises other than a "composition different from that of the substrate."

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2828

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10, and 12-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Treat et al. (US 5412678).

Regarding Claims 10 and 18, Treat et al. discloses a semiconductor laser device including:

an etching control layer (d; col. 5, line 58- col. 6, line 53, labeled cladding layer comprising AlGaInP and functioning as an Etching Control layer), which is formed on a first region of a compound semiconductor substrate and has a composition different from that of the substrate (b; col. 5, line 58- col. 6, line 53);

a first semiconductor laser structure (43; Fig. 4a), which is defined over the etching control layer (Fig. 4a) and which is made up of multiple semiconductor layers including a first active layer with a composition different from that of the etching control layer; and

a second semiconductor laser structure (44; Fig. 4a), which is defined on a second region of the substrate and which is made up of multiple semiconductor layers including a second active layer.

Regarding Claim 11, Treat et al. discloses a channel (u) that separates etching control layers.

Regarding Claims 12-13 and 15-16, Treat et al. discloses a layer comprising AlGaInP as claimed. (col. 5, line 58- col. 6, line 53).

***Response to Arguments***

Applicant's arguments filed 12 February 2003 have been fully considered but they are not persuasive. The Applicant has not made an argument that supports withdraw of the rejections discussed above. The Applicant has merely asserted that Treat et al. fails to disclose the claimed invention without any supporting discussion that particularly addresses each point of the rejections discussed in the previous office action.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
